Dear Business & Human Rights Centre,

Thank you for your email and for providing us with the opportunity to respond.

In response to the report published by Greenpeace on 5 October 2026, we have issued a clarification statement dated 8 October 2026 addressing the allegations and concerns involving fires within and around First Resources' concession areas in West Kalimantan.

As outlined in our statement, effective fire risk management remains a top priority for the Group. We enforce a strict Zero Burning Policy across all planting activities and implement robust fire prevention, monitoring and firefighting measures throughout our operations. In line with our No Deforestation, No Peat and No Exploitation (NDPE) Policy, the Group is committed to ensuring that there is no new development on High Carbon Stock (HCS) forests, High Conservation Value (HCV) and peat areas. In recent months, fire risk across West Kalimantan has been significantly heightened due to prolonged dry conditions associated with the 2026 El Niño event. The Company will continue to work closely with government authorities, local communities, and other stakeholders to mitigate fire risks and support suppression efforts.

Thank you for your understanding and continued engagement.
Regards,
Sustainability Team
First Resources Limited
